

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) A storage device for removably attaching to structures on a boat and for storing items, the storage device comprising:

a support member comprising marine fabric having two opposing sides on a vertical longitudinal axis which are disposed in an oblique relationship to each other;

at least one pocket member comprising marine fabric which is attached to the support member for forming a pocket on the front side of the support member and for receiving an item to be stored on the boat; and

a plurality of straps attached to the support member in a substantially perpendicular relationship to the longitudinal axis of the support member, each of the plurality of straps having a first end for attaching to a first vertical structure and a second end for attaching to a second vertical structure, the first and second vertical structures being disposed in a oblique relationship to each other.

2. (Original) The storage device of claim 1, wherein the support member and the at least one pocket member comprise an acrylic material.

3. (Original) The storage device of claim 1, wherein the support member and the at least one pocket member comprise a woven vinyl-coated polyester fabric.

4. (Original) The storage device of claim 1, wherein the edge of the support member and the pocket member are reinforced with an acrylic binding material.

5. (Original) The storage device of claim 1, wherein the plurality of straps comprise web strapping.

6. (Original) The storage device of claim 1 wherein one of the plurality of straps is positioned at the top of the support member and another of the plurality of straps is positioned at the bottom of the support member.

7. (Original) The storage device of claim 6, further comprising:  
a first pair of D-rings attached to the first end of one of the plurality of straps for attaching the storage device to the first vertical structure; and  
a second pair of D-rings attached to the second end of the one of the plurality of straps for attaching the storage device to the second vertical structure.

8. (Original) The storage device of claim 1, wherein at least two pocket members are attached to the support members to form two vertically-aligned pockets.

9. (Original) The storage device of claim 1, wherein at least two pocket members are attached to the support member to form two horizontally-aligned pockets.
